Please reply in a professional manner and avoid using SMS language, emojis etc. Use of unprofessional language may lead to rejection of your application.

15 December

 Assignment received

Thank you for your interest in our internship opening. As a next step, we are expecting you to complete a short assignment.

Frontend Assignment

I've attached 2 PDFs — one is desktop design, one is mobile. There's also a logo file.

Your job is simple: build this eCommerce homepage exactly as shown using HTML, CSS, and JS only.

What I'm looking for:

Design should match properly — fonts, colors, spacing, padding, margins, everything. Don't eyeball it, actually look at the design and match it.

It should work on all screen sizes.

Chatting with Ved Patel

It should work on all screen sizes.

Desktop version should look like desktop PDF, mobile should look like mobile PDF.

Basic stuff.

Interactions are up to you. The design doesn't show hover effects or animations, so this is where you show me what you can do with JavaScript. Be creative, but don't overdo it.

For images and icons, pick relevant ones from Unsplash, Pexels, Pinterest — wherever. Just make sure they fit the design vibe.

Submit:

GitHub repo (keep code clean and readable)

Live link (Netlify, Vercel, GitHub Pages — anything works)

PS: We're getting a lot of applications, like... a lot. So if you submit early, it tells us two things — you manage time well and you're genuinely interested. The "5:59 PM on deadline day" crowd? Yeah, we notice that too. Don't be that person.  
Deadline: Wednesday, 17th December, 6:00 PM

Thanks,  
Ved

Please find my completed frontend assignment attached. I have implemented the design as per the provided desktop and mobile PDFs, ensuring responsiveness and attention to spacing, fonts, and overall UI consistency. I have given only live link and git profile now currently I am not uploading files, after I more updation then I upload final quality website file on git repository.
